“Upon evaluating the different technology solutions in the market, we realized that only Oracle offers the database strength and security that adjusts to Aerpostal’s operational needs.” – José Angel Cardenas, Systems Manager, Aerpostal Alas de Venezuela

Aerpostal Alas de Venezuela Achieves Online Presence and Improves Financial Processing Times

Since Aerpostal Alas of Venezuela became a private company in 1996, it has been on a mission to become one of the top ten Latin American airlines. The company achieved this goal by operating a fleet of the latest generation planes to national and international destinations. Furthermore, the airline has signed technical and commercial agreements, as well as other agreements to share codes with many prestigious international airlines for technical and commercial cooperation. As a result of its innovative spirit, security, punctuality and excellence in client services, Aerpostal has become the model to follow within the Venezuelan aviation industry.

Challenges

- Implement a technology infrastructure that allows Aerpostal to process and integrate business information, as well as scale for continued growth
- Provide operational flexibility and versatility, allowing users to carry out transactions from any remote location
- Establish an online environment that facilitates access to information and increases the efficiency of various financial processes

Solutions

- Implemented Oracle Database to integrate, unify and secure information between multiple branches
- Reduced the time needed to finalize financial processes and close payroll from five hours to 45 minutes with Oracle Financials
- Used Oracle Database to increase the amount of transactions processed
- Reduced operational costs for all branches by integrating the different systems with Oracle Database
- Integrated financial and operational transactions with Oracle Financials and Legadmi RPS (Regional Personnel System), developed with Oracle Developer, which include Human Resources and Payroll modules
